Subject: Re: GIS database from Nassau County circa 2012 EPA/USGS to NYSDEC

Rob,

I believe we already have the USGS file from several years ago.

I would like to repeat (and expand on) the data mingling exercise with USGS and EPA. I think we should try to include the data that LICAP has gathered also.

I think we are on the precipice of an opportunity to expand out data capabilities and would like to repeat the previous effort, with current data and extra parties, to have a demo item for the powers that be.

I am in Plattsburgh this morning but will be returning to Albany. I will be working on a group communication on the subject, so this is like a preface to the idea. It is summer now, so it may be difficult to gather everyone, but if we start now.... Maybe we can have things in line for September.

When I return, I will look for the USGS file. I remember it was formatted in a unique way, but I am pretty sure someone was able to access it. I need to troll through some older correspondence to remember the details.

Dan

Subject: GIS database from Nassau County circa 2012 EPA/USGS to NYSDEC

ATTENTION: This email came from an external source. Do not open attachments or click on links from unknown senders or unexpected emails.

Hello Steve, Henry and Dan from NYSDEC. This memo is also copied to Jason and Lou from USGS Coram.

Steve recently talked with me about a new upgradient investigation in the Hicksville/Bethpage area potentially impacting both the "Hooker Ruco" and Northrop Grumman facilities. A few years ago EPA had utilized the Interagency Agreement to enable USGS to put together a GIS database which could be viewed in 3 dimensions and cross sections, with concentration on PCE and TCE. The area chosen was Nassau County. There was a planning meeting webinar used for discussion purposes. Jack Monti, the GIS lead for USGS is out injured. I talked with Jason and Lou, and IF you can set up an FTP file transfer, I asked if they could send you the full database. It has excellent metadata. You might have folks that can update with newer results.

There are no issues providing this to NYSDEC.

Rob Alvey
